

About Soufi Hospital

Our hospital was established in November 1989 .

The efforts of our highly skilled staff Combined with the use of the latest medical techniques kept the hospital a pioneer, following every day medical developments .

Through out the Syrian coast , our specialized sections (Pediatrics' Department , Fertilization Center, Scopic Surgery, Orthopedic surgery , …) took the lead and our Plastic Surgery Center , the only of its kind along the coast , is reporting high success rates which explain why clients from all Syrian regions and neighboring Arabic countries are treated at our center .

At the Hair Implantation Center, the first of its kind in Syria, we offer the best solution for baldness, alopecia and scalp burns, which is bio-compatible hair implantation .

Lately , our Scopic Center was equipped with the most modern Japanese Olympus scopes used to investigate the biliary tracts and provide treatment procedures where appropriate without the need to do laparotomy.

Soon , a highly specialized Cardiac Catheterization Center which diagnoses and treats coronary stenoses is to be opened, along with a modern Cardiac Surgery Center .

Our hospital has been and will be always committed to provide the best medical care .
